## *Sixth Public Auction & Mail Bid Sale*

Collectors are far different from the average person. Although they come in all sizes and shapes--as do ordinary people--they are relatively few in number. What really sets them apart is an outsized urge to acquire or an outsized curiosity or both.

Dick Punchard belongs to the curiosity camp. This is not to denigrate his skill at acquiring--he owns or has owned some outstanding large cents, including rare varieties of 1794 and a set of 1823 restrikes by die state. However, the nature of Dick's collecting personality is symbolized by his library: large and well used. These characteristics define an individual who is intensely curious.

Over the years, large cents have attracted a generous proportion of the hobby's most avid collectors. Many books have been written on the subject and, as a result, more is known about the big coppers than is known about most other segments. Indeed, the Punchard library contains virtually all of the standard texts.

Dick chose to venture beyond the boundaries of what was known by entering the less defined world opened by auction catalogues. Having chosen large cents as his basic subject matter, he proceeded to collect virtually every auction sale with relevant content. Meticulous in pursuing

his curiosity, Dick prepared file cards on each catalogue detailing the notable large cents that were offered therein. This careful approach allowed him to develop a fund of information on the rarity of key varieties and the provenance of individual pieces, as well as colorful milestones in the development of copper collecting. Such hard-won information was freely shared with the many enthusiasts in the Early American Coppers Club who sought it.

In the process of ferreting out obscure facts, Dick managed to complete several important series. Among these are the auction catalogues published by New Netherlands Coin Company and the series authored by Barney Bluestone. The Elder offering is particularly noteworthy, being nearly complete and containing any number of individual rarities.

In the end, what is most important is neither the curiosity nor the acquisitions. These were merely the magnets that drew collectors toward this man from Minneapolis. We all respect the knowledge he has gained in his pursuit of the hobby, but we truly value Dick Punchard for his open and caring personality. A book from the Punchard Library will serve as a continuing reminder of empathy enjoyed with a most gifted and responsive individual.

John W. Adams.

## *Sixth Public Auction & Mail Bid Sale*

Dick Punchard in his collecting pursuits embodied the highest form of enjoyment in numismatics: an excellent combination of the thrill of the chase for coins he needed, accompanied by an equal thrill in tracking down books relating to those coins. He realized well that when it comes to numismatic literature, two plus two can equal more than four. No doubt the fine books, auction catalogues, price lists, and other items of numismatic literature he acquired over a long period of time were in many ways more interesting than the coins themselves. And, no doubt, the next generation of owners of the Dick Punchard Collection will enhance their own enjoyment by acquiring some of the publications Mr. Punchard prized so much.

Q. David Bowers

## Biography

Dick Punchard began collecting coins fairly early, and like every one else, he started with Lincoln pennies and buffalo nickels. He befriended one of the tellers at a nearby bank who allowed him to buy unsearched bags of pennies, nickels and dimes with the stipulation that he could have whatever was in there if he brought them back rolled. At that time, back in the late fifties and early sixties, one could find buffalo nickels, Indian head pennies, mercury dimes, and the occasional seated liberty coin. He managed to put together complete Lincoln, Buffalo and Jefferson Head nickel sets, along with some Mercury dimes, but was always interested in other denominations.

In 1964, he noticed an ad in the Sunday paper placed by a woman who was selling three hundred large cents for three hundred dollars. It was a complete set, with a lot of additional pieces from 1793 to 1857. Since he already had purchased a "Red Book", he knew that there were major die varieties of half cents and large cents. He bought all three hundred, brought them home, and started looking through them. All had readable dates, and he started forming a date set.

He also began purchasing Penny Whimsy, Coin World and Numismatic News, and became more involved in the large cent field. In 1974, a year after he joined the Early American Coppers Club, he saw an announcement about an upcoming convention in New York City. Despite the fact that there was no one from the Twin Cities who collected copper, and he wouldn't know anyone at the convention, he thought it would be fun to attend. "So, armed with my deluxe Whitman album, and a complete date set which I was very proud of, I went to New York City."

The first people he met were Ted Nafzger and Walter Breen. Not knowing who they were, he

showed them the date set. "I was really impressed. It felt good that Walter recognized one of the coins in the collection, and that Ted gave me a compliment saying the collection was very nicely matched both in color and surfaces."

That was the catalyst that set him down the road collecting catalogues and books. He thought it would be kind of nice to trace back coins and find out their histories and pedigrees. Interestingly enough, over the years, he did find and trace several coins from his collection through catalogues. During this time, he talked to several EAC members about important books and catalogues and started buying them through friends and auction sales.

"When John Adams published his first book, I decided at that point to try to obtain every catalogue he rated "C" or better, for large cents. This is what I tried to achieve, and I came fairly close to accomplishing that. When the second book came out, I did the same thing, and used all the people that Adams had identified in his second book as being catalogers or collectors and denoting important large cents of "C" quality or better, and used that as a reference too."

It was an effort that spanned more than twenty-five years. "Like everybody else, you never actually complete what you set out to do, some things just never turn up in a sale." Now that he's come as close as he possibly could to achieving his goal, and has been selling off his large cent collection, he felt it was time to sell the catalogues, books, and fixed price lists, and put them in other people's hands. "Years ago, a fellow collector said to me, "as you collect catalogues and coins, you'll find that you'll sell your coins first and your catalogues and books second" I thought the guy was making a ridiculous statement, but as it turns out, that was very true. The last thing to go is your library."

## Introduction

Mr. Dick Punchard, EAC #263, collected a working library and used it daily. Yet the material is in remarkable condition by being well cared for.

Mr. Punchard has meticulously counted and identified all the large cents and catalogued the most important ones. For someone tracking or wanting to do a study on 1793 Strawberry Leaf, 1794 Starred Reverse, 1795 Jefferson Head, and/or 1804 and 1823 restrikes in different metals, for example, the information is contained in each catalogue or fixed price list description. Non-collectibles (NC's) and photos of important cents are also mentioned.

The catalogue designations "Adams A or B Sale" applies to the grade John Adams' assigned to the copper content of each sale in his two books "United States Numismatic Literature-Volume I & II". Mr. Punchard collected virtually every available sale and fixed price list relating to US copper that was available to him for over the past twenty years. Only the A & B sales are designated as such. Dick Punchard has taken the "creative license" of identifying additional sales catalogues and fixed price lists which have not been covered by Adams' by signifying what he feels would have been designated either an A or B sale.

I have received several requests in the past couple of years for pedigree information. Dick kept 3" x 5" cards which contained the following information. Who he bought the material from, the sale and lot number. This will help some of you track sales and number of appearances for future information. Mr. Punchard's book plates and/or ink stamp are in most of the books and some of the other literature.

In listening to you, the customer, as to the type of information you are seeking, I have tried in most cases to identify the most important contents in each catalogue or fixed price list. Many collectors have mentioned that they usually collect in more than one area and want more information

to track a series or particular coin, medal, currency, tokens or other type of item. This is why I have done the extensive annotations on each sale. This will help facilitate your research.

For those of you who do not collect American Copper, please read the descriptions very carefully over a few days as there are definitive collections offered in virtually every area collecting area from around the world. Your special or specific collecting area may very well be hidden in one of the descriptions. This may very well make for dense reading for some, but I believe many of you will find hidden values in these collections.

An interesting observation on the estimates is that many cost no more than what they were selling for 20 or more years ago. The common stays common and the rare or scarce literature remains rare or scarce. Bid wisely to build your reference library.

Additional requests from customers have asked for an exclusively dedicated easy to read index of Consignors to use for research and referral purposes. Pete Smith receives credit for enhancing this catalogue in developing the index. You will also find at the back of this catalogue an easy to refer table of contents by author. Phil Carrigan is to be credited for his ready help and sharing of information on the Canadian material listed.

Last but no means least is the thank you to John Adams and Q. David Bowers for taking time out of their busy schedules to write introductions for Mr. Punchard.

Thank you once again for your local support as customers and consignors. A welcome to the new and first time customers. Let me know how else I can be of help to you.

- 14 "27 Text pages from the FCI Type Coin Program. 1973-1974. Tan card stock, lettered in brown, vignette in upper right hand corner. 27 pages typeset on one side. 2 page glossary on 96 terms from "alloy" to "working die". Three holed at the margin for a binder. The first page of the glossary is soiled with some "pulling" at the punched holes. The remaining sheets are VF to As New.

These pages are from the Type Coin Program offered by First Coinvestors, Inc. (FCI). Each month, the customer would receive one minor United States coin from this program. With the coin was one of these cards which gave the accompanying descriptive text. These cards were to be inserted in a three-ring binder that was provided for the customer by FCI.

Walter Breen wrote the text for these cards in 1973-1974. He was not too pleased with the text, and considered it "hack work", not really worthy of his time or talents. When he did not produce them as quickly as they wanted, they delegated the task of writing them to one or more of the FCI program VP's. As a result, the text was produced by those underlings was far inferior to Breen's, and much of what they wrote was historically incorrect.

When Breen discovered this, he was outraged because these cards were going out under his byline to FCI customers. The pages here, although incomplete, are Breen's work. These pages describing U.S. type coins are generally unknown to the collecting public, as they were only distributed to FCI customers. Jack Collins says, "I do not know if a complete set exists anywhere."

3 pages of half cents: 1800-1808, 1809-1836, 1840-1857.  
7 pages of large cents: 1793 chain, 1793 wreath, 1793-1796 liberty cap, 1796-1807 draped bust, 1808-1914 classic head, 1816-1839 matron head, 1840-1857 braided hair,

3 pages of small cents: (1859) copper nickel Indian cent, no shield; 1860-1864 copper nickel Indian cent with shield; 1864-1909 Indian cents.

7 pages on 3 and 5 cent pieces: nickel 3 cent piece; silver 3 cents, type 1 (1851-1853); silver 3 cents, type 3 (1859-1873); the shield nickels "without rays"; the liberty head nickels "with cents" (1883-1912); Buffalo Nickel on raised ground (1913); Buffalo Nickels on straight ground (1913-1938)

5 pages on draped bust small eagle half dimes (1796-1797); draped bust heraldic eagle half dimes (1800-1805); capped bust half dimes (1829-1837); liberty seated half dimes with stars (1838-1859); liberty seated half dimes with arrows.

2 pages on capped bust dimes large size (1809-1828); and liberty seated dimes, legend on obverse (1860-1891). This is of particular importance as it contains a complete set of Breen's FCI writings on the entire large cent series. his half cent writings contain useful information on original and proof half cents." The above is a direct quote, of Ken Lowe's as usual in-depth descriptive work, of lot 500 from Money Tree's 20th sale. (75.00)

15 Dies and Coinage. 1962. 38 pp. Fine, self paper cover. "This is an up-dating of my old Numismatist article, "how Our Coinage Became Mechanized," and a description of minting and die-making processes in common use from ancient times to the present day, with special emphasis on those in use from the earliest days of the United States Mint till now." -Breen. Author of Monetary Experiments. Much of the original edition of Fractional Money was destroyed in a warehouse fire.

17 Fractional Money: A History of Small Coins and Fractional Paper Currency of the United States. 1930.1988 Reprint by Bowers & Merena. 372 pp. Tables. Mint, card cover. "Fractional Money, by Neil Carothers, here reprinted, is one of the most elusive, yet most valuable source references in the numismatic field. In several hundred pages, the author discusses in detail the economic conditions, legislative acts, and other events which led to the production of various coins from the earliest federal issues through the 20th century, to the time of the book's publication.

While many numismatic references detail coins, die varieties, and other numismatic attributes, relatively few give the why and wherefore on how such coins came to be. Carothers' discussion of economic conditions and the resultant effects on coinage and coinage distribution stands today as the definitive work on the subject..." by Bowers & Merena. (25.00)

## CROSBY, SYLVESTER S.

While Ebener Mason, in his 1868-69 Stamp and Coin Collector's Magazine had been the first to document the die varieties of 1793, his descriptions were not entirely clear, with several being unrecognizable today. In October 1868, however Joseph Levick published a table of auction records and pedigrees for this date, and solicited information from fellow collectors. This project culminated with the preparation of the famous Levick plate in the April 1869 issue of the A.J.N. with a succinct text penned by his collaborator Crosby. As the standard reference until being supplemented by Crosby's larger work in 1897, it was not offprinted, the supposed 100 copies of the Journal being sufficient for contemporary numismatists.

- 25 The United States Cents of 1793. April, 1869 issue of The American Journal of Numismatics, Vol. III, No. 12, Whole No. 36. 1 plate. Fine, Original paper cover, contemporary bound, brown leatherette, gilt. A landmark effort on Large cents. (250.00)

"PROPERTY OF WILLIAM F. SUNDAY, RECEIVED FROM MR. HENRY C. HINES, 7/14/1919."

- 26 The United States Coinage of 1793.— Cents and Half Cents. 1897. 36 pp. 3 plates. Black cloth worn at corners and spine, some cracking at inner spine, Fine overall. "A substantial rewrite of his 1869 paper, Crosby has added considerable background as well as a classification of Half Cents. When published in the American Journal of Numismatics 1896-1897, twenty-one varieties of cents were described. The twenty-second variety, a new marriage of obverse 9 with reverse I, appeared in Frossard's 145th sale and was acquired by Dr. Thomas Hall. This fortuitous timing allowed Crosby to record this discovery as a footnote on page 25 of the offprint published shortly thereafter. 100 years later, only the elimination from the list of 3-B as an alteration (the bogus 2-B, reported in the 1869 paper, had been detected earlier, and was not included in the 1897 work) keeps this monograph from remaining 100% accurate today. ARMAND CHAMPA

I believe that the numismatic literature world has no idea how really great and meaningful the loss of Armand Champa is.

We have lost a person who freely shared and exchanged both his books and knowledge.

We have lost a person who was far more generous than what he received in return.

We have lost a person with a far reaching, infectious enthusiasm and more knowledgeable than most realized.

We have lost "The Man" of numismatic literature.

He moved to San Marino, CA, in 1952. He issued fixed price lists up through at least number 55 in 1934. Conducted 190 auction sales from 1925 to 1960.

#### BOWERS, Q. DAVID.

A COMPLETE SET OF AMERICA'S MOST POPULAR & HISTORICALLY IMPORTANT AUCTION CATALOGUES 1972-1992 & OTHERS. MOST WITH PRICES REALIZED. (excluding the mail bid sales)

For many years the catalogues written by Q. David Bowers and members and consultants of the Staff of Bowers and Ruddy Galleries, Inc., later Bowers and Merena Galleries, served as a focal point in numismatic collecting. They join the highly acclaimed catalogues of the late New Netherlands Coin Company as being joys to possess. Even the smallest catalogue with the most trivial item is apt to contain interesting things to read and much to learn.

The series of Bowers and Merena and related catalogues, 1972 to date, encompasses the three most valuable collections of American coins ever to cross the auction block. The Garrett Collection consigned by The Johns Hopkins University and sold in a series of four events, 1979-1981, still echoes in the halls of numismatic history and lore. The realization of \$25 million was not exceeded until just recently when the sale of the Eliasberg Collection brought the grand total of the three Eliasberg offerings to \$45 million. This trio began in 1982 with the offering of the gold portion.

The American collection of Ambassador and Mrs. R. Henry Norweb auctioned by the firm in three sales, 1987-1989, brought \$20 million, and set many records that have not been tested to this very day.

The Bowers and Merena catalogues have received more "Catalogue of the Year" awards from the Numismatic Literary Guild than have those of any other firm. Dave Bowers recently gave his personal philosophy which seems to go beyond the pale of business: "We only pass this way but once, I really love numismatics, and when I and our staff present coins at auction not only to showcase the coins to their finest advantage, but to provide descriptions that will

at once be interesting to read to beginners as well as advanced collectors, and also reflect the state of the art with regard to background and history attached to particular pieces. All of this is highly enjoyable to me and our other team members. The buyer of this lot will have many months of numismatic enjoyment awaiting him or her."

#### CALIFORNIA STAMP CO.

Three California Stamp Co. sales are identified in Martin Gengerke's book "American Numismatic Auctions". The sale listed below has been offered less than a dozen times while the other two only show 3-4 auction appearances at the most.

"The following Large Cents are from the celebrated collection formed by Dr. Geo. P. French, of Rochester, New York. These cents were among the very first selected from this famous collection when it was broken up, and are in the original separate boxes with the original markings. The prices and numbers are those given in the catalog of this collection issued by the well known numismatist Mr. B. Max Mehl, and represent the cost of these beautiful cents".

#### CHAPMAN, S.H. & H.

They began their numismatic careers as employees of John Haseltine. They started their own business in 1878. They were young and aggressive. Many dealers attempted to purchase the Bushnell collection from his heirs but the Chapmans were successful. Their catalog of the sale set a new high standard for descriptions of the lots and helped establish the reputation of the Chapman's. They made use of photographic plates. In the beginning they were not allowed to present photographs of U.S. Coins and paper money. Henry Chapman introduced legislation to allow such photographs.

Together they conducted 82 auction sales from 1879 to 1906. They had a disagreement after the H.P. Smith sale that caused them to conduct separate auctions after 1906.

- S.H. CHAPMAN SERIES.**  
(b.7/15/1857 d.9/22/1931) He began to collect stamps in 1867. In 1876 he learned the coin business as an employee of John W. Haseltine. In June 1878 he joined his brother in the business. His personal library was described as the finest numismatic library in existence. He held the office of ANA librarian at a time when the collection consisted of copies of *The Numismatist* and Plain talk. He was a charter member of the ANA and member number 28. He was also a member of ANS. His area of special interest was Greek and Roman coins.  
He conducted 28 auction sales from 1907 to 1924 after separating from his brother. He retired as a dealer about 1929. Chapman reminders were sold at auction by Thomas Elder in 1932.  
Author of *United States Cents of the Year 1794* in 1923. About 100 copies were printed. Criticism by George Clapp caused Chapman to withhold distribution in favor of a 1926 revision.

#### FEDERAL COIN EXCHANGE.

Michael Kolman, Jr. operated Mason Coin Shop in Wilkinsburg, PA. President of Federal Coin/Brand Enterprises in Cleveland, Ohio, beginning in 1942. Under his own name he conducted 41 mail bid sales 1956 to 1964. All were published in mint error periodicals. Author of Numismatic Lincoln Cent Errors in 1960. An expanded & revised edition titled Numismatic Flying Eagle, Indian & Lincoln Cent Errors was published in 1963. Kolman was one of the founders of the Collectors of Mint Errors & editor of the C.O.M.B. Bulletin.

#### FROSSARD, EDOUARD.

(b. 1837 d. 4/12/1899) Born near Lake Leman, Switzerland. Emigrated in 1858. Professor of Languages at the Boursand Academy in Brooklyn, NY in 1861.

He began collecting in 1872. He collected American cents for himself and also for George Merritt, the son of a wealthy gentleman. In 1875 he worked for J.W. Scott as editor of the Coin Collector's Journal. He had an art collection that included the work of John Trumbull as well as exquisite miniatures on ivory. Frossard published his newsletter Numisma. The entire series was republished by Ramm Communications. Frossard issued a store card about 1881. It had Masonic symbols on the obverse and a "magic square" on the reverse.

Frossard conducted 176 auction sales from 1878 to 1899. He stated that he catalogued the Montayne collection of 1200 lots within 48 hours start to finish. He issued several fixed price lists 1891 to 1894.

*After Frossard's death, his son, also known as Ed. Frossard, conducted an additional 15 auction sales from 1899 to 1901. Apparently Frossard failed to follow his father's example. The Numismatist was distressed to report that Frossard had "gone south" leaving a considerable debt.*

**HASELTINE, JOHN W.**

(b.9/6/1838 d.2/28/1925) Son-in-law of William Idler. Father-in-law of Stephen K. Nagy. He was a merchant in New Orleans 1859 to 1861. Employed in wholesale boot and shoe business.

He was a partner with Ebenezer Mason in 1869 before venturing out on his own. He employed the Chapman brothers in the mid-1870's. He issued fixed price lists 1872 to 1876. He conducted 85 auctions from 1870 to 1898. In about 1874 he discovered the existence of the Confederate cent patterns. He bought the coins & their dies and produced restrikes.

He was credited with discovery of many rare items. He discovered the existence of the Nova Constellatio 1000 & 500 mill pieces...Haseltine also acted as an agent in the sale of pieces that came out of the mint with questionable validity. Many of these had been held by Idler...

I would like to call your attention to the Several & Rare Printed Prices Realized offered with some of the sales. This maybe the largest offering of so many at one time at auction.

**HESSLEIN, WILLIAM.**

Resident of New Haven, CN, prior to 1914. Dealer in Boston. He conducted at least 53 auctions from 1907 to 1931. They were numbered up to 144. He issued fixed price lists numbered up to 30. In an ad in The Numismatist in 1929 he claimed he was the best known coin dealer in the U.S.. On February 29, 1932, the business was sold off at auction to pay off the holder of the mortgage. The business was purchased by J.F. LeBlanc & operated as Associated Coin & Stamp Co.

Hesslein's catalogues are one of the scarcer 20th century dealer catalogues to be found and at the very most only a dozen of each sale available has been offered at public auction or less than that. In fact most of those offered below came from my consignment to Money Tree in 1990 or by private sale to Mr. Punchard.

### END OF FRIDAY'S NIGHT AUCTION SESSION

## BOOKS

## MARIS, EDWARD.

(b. 3/15/1832 d. 6/13/1900) Born near Chester, PA. Instructor of mathematics at Haverford College. Graduate of Jefferson Medical College in 1856. He is known as "The Quaker Physician" by copper collectors. He was a member of the Society of Friends and wore the customary conservative cloths and broad brim hat.

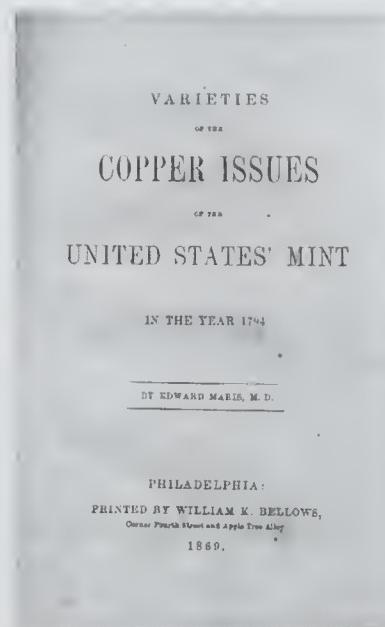

© MARK S. AUERBACH 1989

Author of the book described below. One hundred copies were printed. This edition described 39 varieties for 1794. He gave colorful names for the various obverses of 1794 that are still used occasionally. The 1870 revision increased the number of varieties to 43. He also wrote A Historical Sketch of the Coins of New Jersey in 1881.

*He conducted one auction 11/27/1893. Part of his collection was sold at auction by the Chapman Brothers 11/16/1900. Contained 85 Large cents including 1848 small date.*

The first separately published monograph on large cents or any other denomination for that matter. Curiously dedicated "with its acknowledged imperfections and incompleteness" to the American Numismatic and Archeological Society, The American Journal of Numismatics published a review more in the form a concession of receipt rather than a glowing endorsement. "Having but nine 1794's before us, and those not in very satisfactory condition, we find ourselves quite unable to test the accuracy of the Doctor's descriptions. ... Dr. Maris has our sincere thanks for this effort to enlighten us, and our earnest exhortation to go on by enlarging, improving, correcting, and if need be, illustrating his treatise."

ONE OF THE FINEST COPIES KNOWN!  
LESS THAN 12 ORIGINAL OFFERED IN THE  
PAST 20 YEARS.

- 707 Varieties of the Copper Issues of the Unites States Mint in the Year 1794. 1869, 1st edition. 15 pp. "Contemporary black cloth with original paper covers bound in. Couple of pen and pencil numbers annotated at edge of paper cover, else a Very Fine, sound Copy of one of the rarest works in American numismatics. This copy was purchased by Mr. Hofmann from Abe Kosoff on Feb. 4, 1941, as evidenced by a pencil notation on the front free flyleaf. Of an original printing of a mere 100 copies, very few—perhaps less then fifteen—exist today. Aside from the annotations mentioned, the copy here offered is a fine example, and as such must rank as one of the finest pieces extant. In the monumental Kolbe auction June 12-13, 1981, a similar copy commanded a bid of \$4500 to a floor bidder following a furious fight. The example in the Craige Sale, (Kolbe, Aug. 13, 1983) realized \$2310 in a very depressed market. What the present offering may bring will be determined by the competition; but it must be noted that there are few American numismatic items of any type that are rare or desirable than the piece now offered." -Cal Wilson, Mail Bid sale XVII. It was recused from papers being discarded when Mehl's office was cleaned out following his death in 1957. Either Jack Whitehurst or E.A. (Ed) Rice saved this notebook. Later it was obtained by John Rowe of Dallas, Texas. Dr. George E. Ewing, Jr. got it from Rowe and sold it to Del Bland for \$250.00 on May 24, 1982."

### NEWCOMB, HOWARD ROUNDS.

#### THE FINEST SELECTION OF NEWCOMB'S EVER OFFERED AT ONE TIME!

(b. 12/31/1877 d. 1/7/1945. Author of The United States Cents of the Years 1801-1802-1803 in 1925. One hundred copies were printed. At the ANA Convention in 1925 he exhibited 114 high grade cents of 1801-1802-1803. He was also selling copies of his book at the convention. He wrote the standard reference United States Copper Cents 1816-1857. It was ready for publication about 1938 but various problems including WWII delayed publication until 1944. It was published by Numismatic Review, a subsidiary of Stack's. The standard edition was offered at \$5.00 with a limited deluxe edition available for \$15.00. About 750-1000 thin paper copies were printed. About 50 of those were bound in leather. Perhaps 75-100 thick paper copies were produced with 25 bound in leather and interleaved. The book was reprinted in 1956 (500 copies), 1963 (500 copies) and 1981. Newcomb had been collaborating with Clapp on a book published after his death in 1947, The United States Cents of the Years 1795-1796-1797-1800. Newcomb assembled and exhibited important coins in many series besides large cents. Frossard conducted a sale 5/17/1901, that was an early collection of Howard R. Newcomb. At the time of his death his collection of cents was believed to be the most complete and finest of

the time. The collection was offered for sale in two parts, 2/7/1945, and 5/16/1945. The cents were in individual boxes with Newcomb attributions. These were passed on to buyers. The 487 lots in Part I realized \$21,704.50. Adams "A+". Part II was offered by lot with Blaisdell the successful bidder on many pieces. Then \$500 was added and the cents were offered as a group. Floyd Starr bought the group for \$5350. Adams "A." Newcomb's likeness appears on a medal struck by the California Coin Club for their first anniversary in 1929. It was struck to honor his work on the cents of 1801-1802-1803. His half cent collection was sold to B. Max Mehl in 1935.

- 711 The United States Cents of the Years 1801-1802-1803. 1925 85 pp. 6 plates (5 tissue-interleaved) including the 1 additional supplemental 1803 glossy photographic plate #24. Fine, original brown cloth with a few spots, gilt. A few pencil additions in Newcomb's hand updating the known die state combinations. The magnificent photographs used in this work as well as the 1798-1799 and 1795-1798 & 1800 monographs provide a visual record of these dates not equaled before with collotypes or since with halftones. This catalog was listed in the auction as containing 4 plates when it actually had the 5 regular plates. The supplemental plate #24 has the top left corner chipped else a fine copy. (565.00)

### WILLIARD C. BLAISDELL'S COPY

Blaisdell started collecting large cents in 1933 with a purchase from F.C. Boyd. Began selling duplicates in 1970. Sold the remainder of his half cents and large cents 9/15/1976. Discovered 1794 NC-8 in 1965.

- 713 United States Copper Cents 1816-1857. 1944, 1st edition. 284 pp. 11 plates. Red leather bound, worn around the edges and corners peeking through, front hinge shaky, thin paper, gilt, contents Fine, with addenda. Signed, Personal Copy of Williard C. Blaisdell. The standard work on the second (post Sheldon) series of large cents, this was a revision of the then 60 year old Andrews pamphlet. Newcomb with the assistance of J.P. Young, chose to build on Andrews rather than completely reorder it, and as a result Newcomb and Andrews numbers are the same (i.e. N4 A4) until new dies are presented. Published in the author's manuscript, three editions were prepared in 1944, although only two, the regular edition in cloth of which 1,000 copies were ordered, and a deluxe edition @ \$15.00 were advertised. One of only 50 leather-bound copies printed on regular paper. (200.00)

### OTTO C. STEINBERGER'S MARVELOUSLY PERSONAL ANNOTATED COPY.

Pasted on the bottom of the title page is this typed statement: "Authentic information on the compilation of this Newcomb revision of the Andrews work on Large Cents states that Mr. Newcomb had access to ONLY THREE collections, his own, that of Geo. H. Clapp and approx. 80% of the L.C. Hines accumulation.

Due to the fact that only Three collections were checked this treatise does not cover all of the Large Cent varieties. Several not listed are in the writers personal collection and are so listed in the separate catalogue showing attribution of numbers and prices paid for the coins. George H. Davis, in a letter of March 7, 1948 (see letter file) states that he has 50 varieties not listed above those described to him in my collection in a recent communication. This proves that while this treatise is approx. correct insofar as it goes does not cover all known varieties and should be so understood.

Varieties not listed in and in my personal collection will be added after the dates of coinage shown in this album of Large Cents.

It is hoped that the varieties known to Mr. Davis and not listed may be added at a later date."

715 United States Copper Cents 1816-1857. 1944, 1st edition. 284 pp. 11 plates. Maroon cloth, slight wear around the edges and corners just peeking through, thick paper, gilt, contents Fine. On the fly-leaf is Steinberger's color coded stickers, according to grade, that he used throughout this book to identify his collection. Numerous notes are pasted in throughout regarding Davis New Varieties and other written annotations. Addenda's are present and a pasted sheet on brown paper "Check New Arrival Large cents for Scarcities AFTER Checking for Personal Collection. All Listed Here as SCARCE Have a Newcomb Rating of R-3, R-4-R-5 or R-6 None Under Rarity 2 Listed."

Also laid in is a 12/8/1981 letter from Jules Reiver thanking Punchard for the loan of the book. Personally signed by Steinberger in several places.

*By the way for those who do not know about Mr. Steinberger. In 1954, in collaboration with George Davis, he published Large Cents of the U.S. 1816-1857; New Varieties and Additions. It was intended as a supplement to Newcomb.* (500.00)

### RAYMOND, WAYTE.

(b. 11/9/1886 d. 9/23/1956) Employed as a bank teller 1901 to 1912 with the City National Bank of South Norwalk, CN. Dealer and publisher of many numismatic reference books. Published The United States Copper Coins in 1931 with 21 pages. Also published the Coin Collector Series, The United States Cents 1804-1814 written by George Clapp. Published 160 issues of The Coin Collectors Journal from 1934 to 1952.

The Standard Catalogue, as initiated by Wayte Raymond in 1934, was the first hardbound, annual retail price guide, and for its first three editions, as a catalogue from which coins could be ordered from Scott Stamp and Coin. During its 18 editions, sections were added and deleted as reflected in the changing titles. The evolution from a price guide to a encyclopedia was gradual and became complete in the last three volumes. Aimed at the advanced collector @ \$6.00 when the "Red Book" was selling for \$1.75, it was probably years ahead of its time, and set a base for Taxay's encyclopedia twelve years later. Mr. Punchard assembled the issues below for its early American copper information and illustrations.

### SHELDON, WILLIAM H.

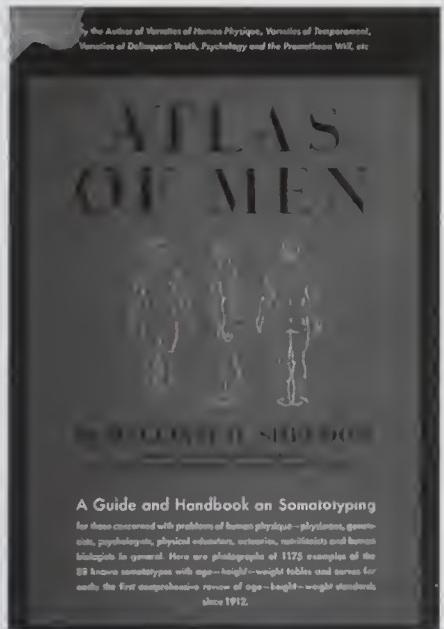

(b. 11/19/1898 d. 9/16/1977) Sheldon developed classification system for people described as endomorph, mesomorph & ectomorph. He wrote noted books in the field of psychology: Psychology and the Promethean Will in 1936; The Varieties of Human Physique; The Varieties of Temperament in 1942; The Varieties of Delinquent Youth in 1949; The Atlas of Men in 1952 & Prometheus Revisited in 1975.

Sheldon learned about coins from a cousin, George Arnold, coin dealer from Providence, RI. Sheldon worked with the Chapman brothers in Philadelphia around 1910. He discovered new cent varieties 1797 NC-4 in 1935 and 1800 NC-4 in 1945. In 1949 he wrote Early American Cents. It was revised and republished as Penny Whimsy. His books gave the foundation of the 70 point grading system. Sheldon was a charter member of the Early American Coppers club and issued honorary membership number 1.

Sheldon sold his first collection of large cents to Charles Fisher in 1932 to finance his medical education. His second collection was consigned to Stack's for their auction of

10/15/1938. Many coins remained unsold and were offered in a Stack's 1939 fixed price list. His third collection of early large cents, 1793 to 1814, included all 295 numbered varieties and 30 non-collectible varieties. This collection was purchased intact by a contemporary collector.

- 734 **Atlas Of Men. A Guide and Handbook on Somatotyping the Adult Male at all Ages.** 1954. 357 pp. 19 tables. 5 figures. Photo illustrated. Nearly Very Fine, torn dust jacket over tan cloth. Signed to Morton Stack. This book came from Money Tree & I will quote their entire description. "Holographically (e.g., in his own handwriting) inscribed on the front fly, "For my young friend Morton Stack, / who has an eye for the rare ones./Wm.-S." Dr. Sheldon introduced in an earlier work the term "ectomorph", "mesomorph", and "endomorph" still used for describing body types. At the time, Sheldon was the Director of the Constitution Library, College of Physicians and Surgeons, Columbia University. Between 1941 and 1945 Sheldon and his associates photographed and measured 46,000 men, compiled case studies of each. Subsequently they attempted to find a correlation between man's structure and personality.

Published 5 years after Early American Cents, which was subtitled, "An Exercise in Descriptive Classification with Tables of Rarity and Value", there is a strong similarity between Sheldon's work with somatotyping and THE classification of large cents. Sheldon's classification of body types and large cents was quite similar. "Here are photographs of 1175 examples (substitute varieties) of the 88 known somotypes (substitute dates)". He quantified people based on height, weight, depth, etc. He also assigned three-digit numbers to all body types. He further used a 7 point (instead of 70 point) scale. And he developed rarity ratings...On the back cover of the tattered dust jacket is a good halftone illustration of Sheldon (left profile), younger than the frontis illustration in the 1976 (1981) Quarterman reprint of Penny Wise.

Purchased from an auction several years ago for about \$300, this is an important and extremely elusive peripheral work (and with a significant numismatic inscription) for the numismatic bibliophile". (450.00)

Acquired from Money Tree, Sale 21, lot 272, 1994.

735 **Early American Cents 1793-1814. An Exercise in Descriptive Classification with Tables of Rarity and value.** 1949, 1st edition. 339 pp. 51 plates. Original, Very fine, tattered dust jacket over tan cloth, gilt. A significant milestone in American numismatics combining all early dates, previously known by their Crosby, Hays, Clapp-Newcomb, Clapp and Newcomb as well as overlapping Doughty designations into a consistent environment. This is the work that initiated the 8 point rarity scale, condition census, basal value, and the 70 point grading system. (90.00)

736 **Penny Whimsy. A Revision of Early American Cents 1793-1814. An Exercise in Descriptive classification with Tables of rarity and Value.** 1958. 340 pp. 51 plates. The John J. Ford, Jr. Numisco Series. Original, Very fine, tattered dust jacket over tan cloth, gilt. Inscribed '59 on fly-leaf. In 1958, with the Collaboration of Walter Breen and Dorothy Paschal, Sheldon reworked the basal values and condition census and retitled the revision. ## STROBRIDGE, WILLIAM HARVEY

(b. 1/9/1822 d. 12/17/1898) Employed as the agent for Fairbanks Scales. Father of T.R. Strobridge. He began as a coin dealer about 1860. he conducted auction sales at Bangs Merwin from 1861 to 1869 and at George Leavitt & Co. from 1870 to 1876. He conducted 28 auction sales 1862 to 1878. His eyesight began to fail. The condition was aggravated by the fine work required to examine coins. His final sale was the Stenz collection. He went totally blind in November 1876. Later sales were catalogued by T.R. Strobridge. Eight more sales were conducted by T.R. 1878 to 1879.

"Strobridge was also scholarly: he is easily the best 19th century student/cataloger of ancient coins and probably of European coins as well".

Beginning with the Lilliendahl sale of May 1862, there follows an absolutely superb series of auction catalogs. While relatively brief in number (twenty-nine), these are unsurpassed in quality of content; twelve-more than 40% - receive a rating of A or better and only the non-numismatic sales fall below a rating of B. Five catalogs fall into the highest possible category: the second Lilliendahl sale (1863), the Clay collection (1871), the descriptive Seavey catalog (1876), the Stenz sale (1875) and the Brevoort/Parmelee sale (1878). The quality of the content of these five is so uniformly high that, in order to draw a modern comparison, one must turn to Garrett-Hopkins."-John Adams
